Experiment 3 : Use Case Diagram

Steps to create diagram

1. Open **draw.io (diagrams.net)**
2. Create **Blank Diagram**
3. Add rectangles for: User ,ChromeExtension ,AudioCapture ,Camera ,SpeechToTextEngine

SignLanguageRecognitionEngine ,TranslationService ,TextDisplayUI ,CaptionOverlayUI

4. Connect arrows:
    a. Voice flow:
    User → ChromeExtension → Audio → STT → Translation → Text UI
    b. Sign flow:
    User → ChromeExtension → Camera → Sign Recognition → Translation → Caption UI
5. Arrange layout:
    a. Left = Voice pipeline
    b. Right = Sign pipeline
6. Export as **PNG**

Diagram Notations

- **User** → person using system
- **ChromeExtension** → interface layer
- **AudioCapture** → captures voice
- **Camera** → captures hand gestures
- **SpeechToTextEngine** → voice → text
- **SignLanguageRecognitionEngine** → gesture → text
- **TranslationService** → processes output
- **TextDisplayUI** → shows text
- **CaptionOverlayUI** → shows captions on screen
