Experiment 7 : ER Diagram

Steps to create diagram

1. Open draw.io (diagrams.net)
2. Create Blank Diagram
3. Add rectangles for entities:
   User, Session, AudioInput, GestureInput, TextOutput, Translation
4. Add attributes inside each entity
5. Connect relationships:
6. User → Session (1:N)
   Session → AudioInput (1:1)
   Session → GestureInput (1:1)
   AudioInput → TextOutput (1:1)
   GestureInput → TextOutput (1:1)
   TextOutput → Translation (0:1)
7. Add cardinality labels (1:1, 1:N, 0:1)
8. Export as PNG

Diagram Notations

- User → system user
- Session → one interaction instance
- AudioInput → voice data
- GestureInput → hand gesture data
- TextOutput → generated text
- Translation → optional translated text
- 1:N → one user can have many sessions
- 1:1 → one-to-one relationship
- 0:1 → optional relationship
